PI NEW COMPUTE MODULE and IO **BOARD** designed using Cadence Io Pi The IO Pi Plus is a 32 channel digital expansion board designed for use on the Raspberry Pi. The board is based around the MCP23017 16-bit I/O expander from Microchip Page 12/40

Technology Inc. A pair of MCP23017 expanders are included on the board allowing you to connect up to 32 digital inputs or outputs to the Raspberry Pi.

IO Pi Plus - 32 Channel Port Expander for the Raspberry Pi Page 13/40

The IO Pi is a 32 channel digital expansion board designed for use on the Raspberry Pi computer platform. The board is based around the MCP23017 16-bit I/O expander from Microchip Technology Inc. A pair of MCP23017 expanders are Page 14/40

included on the board allowing you to connect up to 32 digital inputs or outputs to the Raspberry Pi.

IO Pi - AB
Electronics UK
Driving Relays or
higher loads with
the IO Pi The
output from the IO
expansion boards
Page 15/40

can drive up to 25mA per channel but to drive higher loads such as relays or some opto-isolators you will need to boost the output using a transistor or mosfets. The circuit below shows how you can operate a 5V coil relay using either a GPIO Page 16/40

output from...

IO Pi in the AB Flectronics UK Knowledge Base The IO Pi Plus is a 32 channel digital expansion board designed for use on the Raspberry Pi. The board is based around the MCP23017 16-bit I/O expander from Page 17/40

Microchip Technology Inc. A pair of MCP23017 expanders are included on the board allowing you to connect up to 32 digital inputs or outputs to the Raspberry Pi.
