This collection discusses the concept of fraternity and examines the issue of its role in law. Since the end of World War II, fraternity has been cited in several national constitutional charters, in addition to the United Nations Universal Declaration of Human Rights. But is there space for fraternity in law? The contributions to this book form an ideal “ bridge ” between the past and present to trace the different pathways taken to address the meaning of fraternity, and to identify its possible legal relevance. The book lays out paths that have placed fraternity in varied and

challenging legal contexts in an age of globalization and conflict, where the multiplicity of national and supranational sources of law seems to show its inadequacy to govern complexity, and coexistence between diversities that appear irreconcilable. The purpose is not to recover fraternity as a forgotten principle, but to reimagine it today to address the aim and force of law within a plurality of cultures. The analysis considers a possible universal dimension that models unity within diversity, and aspires to serve as a prologue to a transition from research to dialogue between different legal systems and traditions. The book will be of interest to academics and researchers working in the areas of Comparative Law, Legal History and Legal Philosophy.

Recent migratory flows to Europe have brought about considerable changes in many countries. Italy in particular offers a unique point of view, since it is possible to observe not only the way migration has changed specific features of the country, but also how it is intertwined with gender relations. Considering both the type of migration that has affected Italy and the consequent measures adopted by the Government, a variety of distinctive elements may be seen. By providing a broad and more complete picture of the Italian perspective on gender and migration, this book makes a valuable contribution to the wider debate. The contributions consider the problematic linkage between gender and migration, as well as analyse particular aspects including Italian colonial past, domestic work, self-determination, access to social services, second-generation migrant women, family law, multiculturalism and religious symbols. Taking an empirical and theoretical approach, the volume underlines both the multifaceted problems affecting migrant women in Italy and the way in which questions raised in other countries are introduced and redefined by Italian scholarship. The book presents a valuable resource for researchers, academics and policy-makers working in the areas of migration and gender studies.

economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.

In the Community-building process, citizens are the most invoked and feared, but at the same time the least known subject. This lack of knowledge nourishes the citizens' detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration. This gap is true especially for active citizenship organizations operating in the European policy making, not only in Brussels, but also and above all at national and local levels, and this book is aimed at filling this knowledge gap. The book is divided into two parts. The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making. The second part discusses a number of empirical research projects on civic activism in Europe. This book aims, on the one hand, to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved; and, on the other hand, to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level. The distinctiveness of the book is that it tries to overcome both the "methodological nationalism" that affects the research

and public debate on the EU, the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena, and the habit of dealing with civic associations in Europe by referring only to the “ Brussels Civil Society,” making it of interest to both policy makers as well as students and scholars in European Studies, Political Science, Sociology and International Relations.

Attraversiamo una crisi di sistema – ambientale, economica, sociale, politica – che minaccia le democrazie costituzionali e la stessa umanità. Eppure la nostra capacità di apprendere dalle catastrofi è assai limitata: abbiamo bisogno di una nuova teoria critica della società per capire che fare e, soprattutto, per individuare chi può fare ciò che andrebbe fatto. Esistono oggi, e come agiscono, soggettività collettive capaci di realizzare un progetto di trasformazione radicale? La filosofia di Jürgen Habermas può fornire una risposta, a condizione di essere “ rimessa sui piedi ” delle lotte sociali

da cui derivano le sue categorie fondamentali. L'alternativa al neo-liberalismo e al nazionalismo emerge così nei conflitti di cittadinanza: i cittadini e le cittadine, attuali o potenziali, usano la forza del diritto per contrapporsi ai poteri capitalistici, burocratici e autoritari, allo scopo di estendere la titolarità e il godimento dei diritti a vantaggio di chi ne è stato escluso.
